

Origin

PIBI was born as the first block in the chain (blockchain), representing the dawn of a new era. Created in a chaotic digital environment, it emerged as a pioneer in the quest for order and innovation.

Purpose

As the leader of PBAC, PIBI aims to unite more blocks, strengthen the network, and foster community growth.

Characteristics

- **Name:** PIBI
- **Role:** Genesis Block
- **Personality:** Determined, resilient, and humorous, with a strong expression that signifies leadership.
- **Power:** Bridges the physical and digital worlds.

Mission of PBAC

PBAC (Pixel Bloko Ant Club) represents not just NFTs but also the creation of a community and blockchain integration.

- **Building Blocks:** Each PBAC member is a block contributing to the universe's expansion.
- **Exclusive Tokens:** Owning PBACs unlocks special rewards, access to events, or participation in the project.
- **Gamification:** Develop a game inspired by the Rubik's Cube, where PIBI guides players through blockchain challenges.

Character Design

Expanding the Visual Universe

- **New PBACs:** Characters inspired by PIBI, each with unique traits and personalities, all as 1/1 editions.

Examples:

- **PIXELATOR:** The strategist block that solves problems.
- **BLOCKIE:** The optimist bringing color and energy to the club.

Introduction

The Pixel Bloko ANT Club (PBAC) is an innovative project that integrates digital art, blockchain technology, and gamification to create an inclusive and dynamic community. Our goal is to offer a platform where art and technology converge, providing participants with unique experiences and exclusive rewards.

Contract: **0xcb911d9662e11813c1589f142dfd747772bd423**

Problem and Solution

In the current landscape, there is a disconnect between digital art and emerging technologies like blockchain. Additionally, many NFT projects lack practical utility and community engagement. PBAC addresses these challenges by:

- Integrating usable digital art with blockchain technology.
- Offering a platform that combines gamification, rewards, and community engagement.
- Creating an ecosystem where participants have an active voice in project decisions.

Vision

To build an inclusive, blockchain-based community where digital art and technology converge to create unique experiences and exclusive rewards.

Mission

To bring together individuals passionate about digital art and technology, offering a platform that promotes creativity, engagement, and reward through the integration of NFTs, tokens, and gamification.

Tokenomics

- **Token Name:** \$PBAC
- **Total Supply:** 20 trillion tokens
- **Distribution:**
 - 30% Liquidity pool
 - 20% for the development team
 - 10% Company reserve
 - 20% to partnerships and marketing
 - 20% Full Team
- **Utility:**
 - Acquisition of exclusive NFTs
 - Participation in events and competitions
 - Governance and voting on project decisions

NFT Utility

PBAC NFTs, known as Pixel Bloko ANT CLUB (PIBIS), are unique (1/1) editions that offer:

- Access to exclusive events.
- Rewards in \$PBAC tokens.
- Participation in games and challenges with prizes.
- Voting on project decisions, promoting decentralized governance.

Roadmap

Phase 1: Concept and Creation (Completed)

- Develop the PBAC concept, combining usable NFT art with blockchain technology.
- Launch the first 9 PIBIS as unique (1/1) editions, inspired by the Rubik's Cube and blockchain blocks.
- Establish initial partnerships and build the platform infrastructure.

Phase 2: Token Launch (\$PBAC)

- Launch the \$PBAC token initially as a meme coin. (Completed)
- Release the \$PBAC token with a total supply of 20 trillion units. (Completed)
- Add liquidity on PancakeSwap to initiate trading. (Completed)
- Launch promotional campaigns to attract initial supporters. (In development)

Phase 3: Completing the Rubik's Cube

- Introduce 45 new PIBIS to complete the Rubik's Cube, with six thematic cores.
- Ensure all PIBIS are unique (1/1) editions, ensuring rarity and exclusivity.
- Create a gamification where, once the cube is completed, a new "PIBI block" is initiated, similar to the BTC block process.
- Introduce Democratic Voting: Whenever a wallet holds 54 PIBIS from the same Rubik's Cube, it gains 1 vote on company decisions, allowing the community to influence project actions, up to a maximum of 49% of participants.
- Add utilities such as community initiatives, exclusive rewards, and more benefits for holders.

Phase 4: Listings and Visibility (Completed during 2025)

- List the \$PBAC token on CoinMarketCap, Coinex, and CoinGecko.
- Expand availability on decentralized exchanges like PancakeSwap.
- Beyond the existing partnership with the Rarible platform, seek additional collaborations with NFT marketplaces to display and trade PIBI collections, while developing the Pixel Bloko marketplace, planned for Phase 6.
- Build the PIBI community.
- Increase community engagement with events and campaigns.
- Implement a \$PBAC staking system for token holders.

Phase 5: Community Growth and Ecosystem Development

- Organize interactive events, competitions, and activities to promote \$PBAC and PIBIs.
- Reward \$PBAC holders to encourage loyalty and engagement.
- Influencer and Ambassador Partnerships: Collaborate with influencers and ambassadors to enhance brand visibility and recognition.
- Long-Term Goal Planning with Public Roadmap: Present long-term objectives to the community, creating a strategic vision and building investor confidence.
- Real-Time Data Analytics Projection: Implement tools for investors to track the performance of PIBIs and \$PBAC in real-time, improving transparency and trust.

Phase 6: Expansion and Innovation

- (Stage to be completed by March 21, 2029)
 - **Art Market:** Allow artists to sell pixel artworks, promoting greater accessibility. Buyers will be able to review their pixels to generate continuous value.
 - **Commercial Rights:** Artists will be able to license images by splitting ownership into pixels or sell the rights in full. 70% of profits will go to the artist, and 30% will be allocated to the platform, development, and liquidity.
 - **Blockchain Registration:** Ensure that all transactions are registered on the blockchain with transparency, exclusivity, and security.
 - **Interactive and Dynamic NFTs:** Present NFTs that change or evolve over time, such as images or interactive art, to create dynamic value and ongoing engagement.
 - **Social Trading Tools on Marketplace:** Allow users to share strategies, tips, and trends about PIBIs and \$PBAC.
 - **Auctions for Exclusive PIBIs:** Implement auction functionality for rare and exclusive PIBIs, increasing competition and asset value.
 - **Smart Royalties:** Implement automatic and smart royalties to ensure artists and investors receive a percentage of the value of subsequent sales of PIBIs.
- **Commercial Partnerships:** Establish collaborations with companies and brands to use PIBIs in products, advertising, and even in metaverse environments.
- **Scale Global Marketing and Improve the PBAC Ecosystem:** Improve PBAC's ecosystem based on community feedback.
- **Explore the Use of PIBIs in Games, Metaverse Platforms, and AI Integrations.**
